

Product Overview

The Acer AB2x280 F1 twin node server blade intelligently works together with Acer blade enclosures to meet the growing demands of expanding large-enterprise data centers, cluster computing applications, or heavy and diverse workloads. The Acer AB2x280 F1 offers optimized density, availability, highest computing power, and manageability by sharing the same power supplies, cooling fans, manageability utilities, and network switches, while delivering outstanding energy efficiency in a dense environment.

AB2x280 F1 Server Blade Overview

1. Up to 4 x 2.5" hot-plug SATA HDD, or SSD

Product Inside and Front Views

AB2x280 F1 Server Blade Internal view (per node)

1. Up to Two Intel® Xeon® 5600 series processors
2. Up to Eight ECC DDR3 1333 MHz registered or unbuffered memory slots
3. Support for up to two hot-plug 2.5" SATA hard drives or solid state drives with software RAID 0 and 1 support
4. PCI Express® 2.0 x16 mezzanine card slot
5. Mid-plane connectors
6. Intel ICH10R
7. Intel 5500 Chipset
8. Battery
9. Front I/O module
10. BIOS Chip

AB2x280 F1 Server Blade Front Indicator Overview

1. Power button
2. KVM button (local KVM support with CMM)
3. Power LED
4. KVM/ID LED
5. Network/InfiniBand LED
6. Status/fault indicator
7. KVM connector
8. 2.5" Hot-plug SATA HDD or SSD

What's New

- New Intel® Xeon® 5600 Series processors
- InfiniBand with QDR connection
- Hot-plug and high-efficiency 94%+ power supply module
- Two nodes in one server blade

AB2x280 F1 Blade Specifications (per node)¹

Processors and Chipset

- Up to two Intel Xeon 5600 series processors
 - (up to four processors per AB2x280 F1 server blade)
- DDR3 memory

Memory²

- Memory capacity:
 - Registered DIMM: 2, 4, 8, 16 GB³
 - Unbuffered DIMM: 2, 4 GB
- Up to 128 GB registered memory when fully populated with 2 DIMMs per channel in 8 slots
- Up to 32 GB unbuffered memory when fully populated with 2 DIMMs per channel in 8 slots

Network Controllers

- Integrated dual ports Intel 82576EB Gigabit Ethernet Controller

Graphics controller

- iBMC controller embedded
- 16 MB video memory
- 1280x 1024 with 16 M colors resolution supported

Storage

- Hard disk form factor: 2.5"
- Type: SATA/SSD with hot plug capability
- HDD Capacity (enterprise level):
- 2.5" SATA HDD capacity: 150 GB, 300 GB, 500 GB
 - 2.5" SSD capacity: 32 GB and 64 GB
 - 2.5" Maximum capacity:
- Up to 1 TB SATA HDD (500 GB 2.5" x 16 HDDs)
- Up to 128 GB SSD (64 GB 2.5" x 2 HDDs)

Storage Controllers

- Integrated Intel ICH10R I/O controller (six 3 Gb/s SATA ports) with RAID 0 and 1 support

Expansion slots

- One PCIe 2.0 x 16 mezzanine card slot

Management

- Acer Smart Blade Manager for all Acer server blades within the managed network
- Acer Smart Blade Console for server blades within Acer Blade Enclosure
- Acer Smart Console for components within Acer server blade

Security

- Administrator/User password
- Setup password
- Removable device boot control
- Serial interface control

¹ One system may have up to 2 nodes.

² Mixed use of registered memory and unbuffered ECC memory not supported

³ 16 GB memory modules available by special request only

Deployment/Serviceability

- Tool-less chassis entry and component
- Tool-less rackmount kit
- Acer Smart Setup
- BIOS update tool, supporting DOS and Windows OS
- IPMI Firmware update tool, supporting DOS and Windows OS

Operating Systems

- Windows Server® 2008
- Windows Server® 2008 R2
- Windows Server® 2003
- Red Hat® Enterprise Linux 5
- SuSE® Linux Enterprise Server 11
- VMware ESXi™ 4
- VMware ESX™ 4

Input/output interface

Front

- KVM button
- KVM/ ID LED
- KVM connector
- Two USB ports
- One VGA port
- One Power/off button
- LED indicators: power, HDD activity, LAN port 1 through 4, Infiniband and ID

Rear

- Two proprietary connectors to connect to mid-plane

Chassis/Form Factor

- Proprietary

Power Supply

- Please refer to the AB7000 blade enclosure power specifications

Regulatory Compliant Standards

EMC

- FCC (Class A)
- CE (Class A)

Safety

- UL
- CB

Technical Specifications

Dimensions	11.32" (H) x 1.67" (W) x 20.5" (D)	
Form factor	Proprietary. Up to 10 blades per 7U Acer blade enclosure rack mountable	
Weight	Maximum 15.6 kg approximately with full configuration (2 processors, 4 memory modules, and 1 HDD) Minimum 10.6 kg approximately with standard configuration (1 processor, 1 memory module, and one HDD)	
Power Specifications	Listed in the AB7000 Enclosure power specification	
System Inlet Temperature	Operating	10° to 35°C (50° to 95°F) at sea level, no direct sustained sunlight. Maximum rate of change is 10°C/hr (18°F/hr). The upper limit may be limited by the type and number of options installed. System performance may be reduced if operating with a fan fault or above 30°C (86°F).
Relative Humidity (non-condensing)	Operating	10 to 90% relative humidity (Rh), 28°C (82.4°F) maximum wet bulb temperature, non-condensing.
	Non-operating	5 to 95% relative humidity (Rh), 38.7°C (101.7°F) maximum wet bulb temperature, non-condensing.
Acoustic Noise	Listed in the AB7000 Enclosure Acoustic Specifications.	

Standard Features (per node)

Processors

Intel Xeon Six-Core processor

X5675 (12 MB L3 cache, 3.06 GHz, 6.4 GT/s, DDR3-1333 MHz, 95 W)

X5650 (12 MB L3 cache, 2.66 GHz, 6.4 GT/s, DDR3-1333 MHz, 95 W)

Intel Xeon Quad-Core processor

E5620 (12 MB L3 cache, 2.40 GHz, 5.86 GT/s, DDR3-1066 MHz, 80 W)

L5630 (12 MB L3 cache, 2.13 GHz, 5.86 GT/s, DDR3-1066 MHz, 40 W)

E5606 (8 MB L3 cache, 2.13 GHz, 4.8 GT/s, DDR3-1066 MHz, 80 W)

Chipset

Intel 5500 Chipset

Memory⁴	Type	DDR3 1333 MHz Registered memory DDR3 1333 MHz Unbuffered memory
	DIMM sockets	8
	Capacity	Registered DIMM: 2 / 4 / 8 / 16 ⁵ GB Unbuffered DIMM: 2 / 4 GB
	Maximum capacity	Registered DIMM: 128 GB Unbuffered DIMM: 32 GB
Memory protection	ECC, Mirroring, Lockstep Mode, x8 SDDC	
Network controller	Integrated Intel® 82576EB dual port Gigabit Ethernet Controller	
Expansion slot	One PCIe Generation 2 x16 mezzanine card slot	
InfiniBand	4x QDR (40 Gb/s) infiniband HCS (single & dual-port)	
(select models)	Internal Ports	Twenty internal 4x QDR ports
	External Uplink Ports	Sixteen 4x QDR external uplink ports (QSFP connectors)
	Bandwidth	4xQDR (40Gbps) non-blocking architecture, 2.88Tbps total switch bandwidth (36-port)
	Management OS	In-band infiniband IBML/CLI Firmware upgradeable

⁴ Mixed use of registered memory and unbuffered ECC memory not supported.

⁵ 8 and 16 GB memory module support is available upon request.

Storage controller (per node)	Integrated ICH10R SATA controller (six 3 GB/s SATA ports) support	
Integrated Serial ATA controller	Simultaneous drive transfer channels	6 channels
	Transfer rate synchronous (maximum theoretical)	3 GB/s per channel
	Data transfer method	non-RAID mode RAID mode
	Drive support	Serial ATA
	Data transfer modes	Legacy mode Combined mode
	Protocol	Serial ATA

Server Management Utilities and Applications

Comprehensive management solutions deliver powerful and intuitive management features to simplify server set ups, configuration, management, monitoring, and reporting for the entire lifecycle of servers. Centralized administration and automatic management with remote access control free the IT resources and meet the complex business environment. Proactive monitoring and notification lead higher customers' satisfaction and higher levels of operational efficiency.

Acer Smart Setup 2.0	Easy deployment via the latest version of Acer's Smart Setup. Smart Setup is available both in box as a driver packed installation DVD or a downloadable file to be put into a USB 2.0 device, and eases the deployment of Acer servers for any certified OS. Through its unique interface, users may select to have all the correct drivers be pre-deployed for the OS of their choosing, as well as setup hardware RAID devices, BMC settings (where available), and even clone the pre-settings to a bootable USB device to ease mass server deployments.
Acer Smart Console	A default build web-based management utility to simplify system management with embedded in iBMC, system monitoring and alerting, event handling, remote power control and KVM-over-IP. It is OS independent and offers virtual media through floppy, ODD, and removable disk
Acer Smart Blade Console	A default bundle built-in web-based management console designed for all Acer server blades in the Acer Blade Enclosure offering health monitoring, alert notification, and KVM-over-IP remote management.
Acer Smart Blade Manager	<p>A default bundle management tool offering remote management for system health and performance for the entire Acer server blades within the managed network.</p> <ul style="list-style-type: none"> • Delivering proactive event management features including system event logging, and setting SNMP Trap (PET) alerting. • Allowing remote control from KVM and Power control
Intelligent manageability	<ul style="list-style-type: none"> • Automatic Server Recovery (ASR) • Integrated Management Log • Front and Rear ID button/LED • BIOS Update tool for DOS • IPMI Firmware Update tool supporting DOS and Windows OS and Linux
Environment-friendly products and approach	Acer offers end-of-life product return, trade-in, and recycling programs in many geographic areas. Products returned to will be recycled, recovered or disposed of in a responsible manner.

Memory Population

Each node has eight DIMM slots. Each CPU controls four DIMM slots. The DIMM slots support three channel DDR3-1333 registered/unbuffered ECC memory modules. For the system to function, DIMM modules must be installed following the slot sequence listed below. DIMM module of the same type, size and manufacturer must be installed in the same colored DIMM slots.

Independent mode:

Single processor configuration

Total Capacity	DIMM 1B	DIMM 1A	DIMM 2A	DIMM 3A

128GB*	16GB	16GB	16GB	16GB	16GB	16GB	16GB	16GB

Mirroring mode:

- In mirroring mode, the memory contains a primary image and a copy of the primary image therefore the effective size of memory is reduced by one half.
- Channel 3 has no function in these modes.
- Follow the population rules described in independent mode.
- Mirroring mode needs the channel 1 & channel 2 DIMMs to be identical. DIMM slot populations within a channel do not have to be identical but the same DIMM slot location across channel 1 and channel 2 must be the same. DIMM1A and DIMM2A should be the same type, size and manufacturer. DIMM1B and DIMM2B memory should be the same type, size and manufacturer. DIMM1C and DIMM2C memory should be the same type, size and manufacturer.
- Same rules apply to CPU2.
- Please refer to the User Guide for complete population rules for both single and dual processor configurations.

Lockstep mode:

- In Lockstep Channel Mode, each memory access is 128-bit data access that spans Channel 1 and Channel 2. This is done to support SDDC for DRAM devices with 8-bit wide data ports. The same address is used on both channels such that an address error on any channel is detectable.
- Lockstep Channel mode is the only RAS mode that supports x8 SDDC.
- Channel 3 has no function in these modes.
- Follow the population rules described in independent mode.
- Lockstep mode needs the channel 1 & channel 2 DIMMs to be identical. DIMM slot populations within a channel do not have to be identical but the same DIMM slot location across channel 1 and channel 2 must be the same. DIMM1A and DIMM2A should be the same type, size and manufacturer. DIMM1B and DIMM2B memory should be the same type, size and manufacturer. DIMM1C and DIMM2C memory should be the same type, size and manufacturer.
- Same rules apply to CPU2.
- Please refer to the User Guide for complete population rules for both single and dual processor configurations.

Sparing mode:

- In sparing mode, if the system detects degrading memory, the data in the failed channel will be copied to the spare channel. The failed channel is then isolated and the spare channel becomes active. Any uncorrectable error detected before the isolation will cause the system to stop normal operation.
- Channel 3 is the spare channel. Therefore, the effective size will be reduced by one-third.
- Follow the population rules described in independent mode.
- Sparing mode needs all three channels to utilize identical DIMMs. 1A, 2A and 3A should be the same type, size and manufacturer. 1B, 2B and 3B memory should be the same type, size and manufacturer. 1C, 2C and 3C memory should be the same type, size and manufacturer.
- Same rule is applied to CPU2.
- Please refer to the User Guide for complete population rules for both single and dual processor configurations.

Memory Identification

Generally, there is memory information printed on the label of the DIMM, but different vendors may have different formats. For example:

4GB 2Rx4 PC3-10600R xx xx xxx

1. Density

- 2GB, 4GB, 8GB, 16GB
- Intel® Xeon® 5600 series processors support DIMMs organized by 1Gb, 2Gb or 4Gb DRAM chips

2. Rank

- 1R = Single Rank
- 2R = Dual Rank
- 4R = Quad Rank

3. Bit Organization

- This platform supports x4 and x8
- Note: It's not recommend to mix DIMMs with different bit organizations in one system

4. Speed

- PC3 – 6400 => DDR3- 800
- PC3 – 8500 => DDR3- 1066
- PC3 – 10600 => DDR3- 1333

1GB/10GB Ethernet Switch Module Specifications

The 1/10 Gigabit Ethernet layer 2/3 Switch module offers advanced switching features and connection to 10-Gigabit Ethernet networks. Offering two internal Ethernet paths to the CMM(s) allows better configuration, management, and control of the switch and its ports through a browser-based management interface. In addition to the Web-based GUI, it offers a CLI for flexibility in management and control of single or multiple switch networks.

Chassis Management Module (CMM) Specifications

CMM provides total remote control of individual server blades, power supplies, cooling fans, and networking switches remotely. System administrators enjoy the management ease and reassurance of continuous onboard instrumentation monitoring (temperature sensors, power status, voltages and fan speed). Remote power control capabilities to reboot and/or reset the server are available as well as remote access to the BIOS configuration and operating system console information vial SOL (Serial over LAN) or embedded KVM capabilities. This controller is a separate processor, all monitoring and control functions operate flawlessly regardless of blade CPU operation or system power-on status.

Infiniband Mezzanine HCA Module Specifications

With low-latency and high-bandwidth for performance-driven server and storage applications in enterprise data centers and high-performance computing, Acer Infiniband Mezzanine HCA module simplifies network deployment by consolidating clustering, communications, storage, and management I/O and by providing enhanced performance in virtualization server environments.

Category	Specification
Chipset	<ul style="list-style-type: none">• Mellanox ConnectX
Port	<ul style="list-style-type: none">• Single or Dual QDR port (40Gb/s)
Key Features	<ul style="list-style-type: none">• 1.2us MPI ping latency• PCI Express 2.0 (up to 5GT/s)• CPU offload of transport operations• End-to-end QoS and congestion control• Hardware-based I/O virtualization• TCP/UDP/IP stateless offload

Service and Support

Acer Servers offers a comprehensive service suite to take care of your hardware investment. Users can select the 3-year standard warranty or choose extended warranties and services⁶.

The standard warranty for the AB2x280 F1 includes three years Parts coverage with all three years including Labor and On-Site coverage.

Warranty repairs may be accomplished through the use of Customer Replacement Unit (CRU) parts. CRU parts include: Hot Plug Hard Drives and Hot Plug Power Supplies. These parts are designed for easy replacement without tools. Travel and labor charges may apply if customers decline to replace a CRU part.

In a continuing effort to improve the quality of our products, information in this document is subject to change without notice. Images shown are only representations of some of the configurations available for this model. Availability may vary depending on region.

<u>Acer Standard Server Models</u>	Part Number
Acer AB2x280 SFF Models	
Acer AB2x280 F1 Blade Server, Two Nodes each with: 1x Xeon E5606, 2x4GB DDR3 Reg, no HDD, 2x2,5"HDD bay, Onboard SATA, 2x GBit LAN onboard	TX.R6500.006
Acer AB2x280 F1 Blade Server, Two Nodes each with: 1x Xeon E5620, 2x4GB DDR3 Reg, no HDD, 2x2,5"HDD bay, Onboard SATA, 2x GBit LAN onboard	TX.R6500.002
Acer AB2x280 F1 Blade Server, Two Nodes each with: 1x Xeon X5650, 2x4GB DDR3 Reg, no HDD, 2x2,5"HDD bay, Onboard SATA, 2x GBit LAN onboard	TX.R6500.003
Acer AB2x280 F1 Blade Server, Two Nodes each with: 1x Xeon L5630, 2x4GB DDR3 Reg, no HDD, 2x2,5"HDD bay, Onboard SATA, 2x GBit LAN onboard	TX.R6500.005
Acer AB2x280 F1 Blade Server, Two Nodes each with: 1x Xeon X5675, 2x4GB DDR3 Reg, no HDD, 2x2,5"HDD bay, Onboard SATA, 2x GBit LAN onboard	TX.R6500.007
Acer Blade Enclosures	
Acer AB7000 F1 Blade Enclosure. 7U Rack, up to 10 blades (no Blades included), Chassis Management Module (CMM), 1Gb/10Gb Ethernet Switch Module (20x 1Gbps ports for blades, 3x 10Gbps external ports), 4x 2500W 80+ Gold PSU (94% peak efficiency) w/ UPS Power Cord, Rack Rail Kit.	TE.R6T00.002
<u>Acer Key Options</u>	Part Number
<u>Acer CPU Heatsink</u>	
Note: one heatsink required for each processor option kit	
Acer Intel CPU heat-sink (TDP 95W supported) for 1U rack, Gemini, and blade server	TC.34900.005
<u>Acer Processor upgrade kits</u>	
Note: one heatsink required for each processor option kit	
Note: all processors in a system must match	
Acer Intel® Xeon® processor E5606 (B-1) Kit	TC.32500.041
Acer Intel® Xeon® processor E5620 (B-1) Kit	TC.32500.024
Acer Intel® Xeon® processor L5630 (B-1) Kit	TC.32500.026
Acer Intel® Xeon® processor X5650 (B-1) Kit	TC.32500.022
Acer Intel® Xeon® processor X5675 (B-1) Kit	TC.32500.039
<u>Acer Memory</u>	
Note: cannot mix Unbuffered memory with Registered memory	
Note: please refer to "Memory Support" Section for details on configuring memory	
<u>Acer Unbuffered Memory</u>	
Acer 2GB DDR3-1333 Unbuffered Memory Kit (1 pc.)	TC.33100.035
Acer 4GB DDR3-1333Unbuffered Memory Kit (1 pc.)	TC.33100.037

<u>Acer Registered Memory</u>	
Acer 2GB DDR3-1333Registered Memory Kit (1 pc.)	TC.33100.029
Acer 4GB DDR3-1333Registered Memory Kit (1 pc.)	TC.33100.031
Acer 8GB DDR3-1333Registered Memory Kit (1 pc.)	TC.33100.042
<u>Acer Storage</u>	
<u>Acer SATA Hot Plug SFF (2.5-inch) Midline (MDL) Drives</u>	
Acer 150GB 3Gb/s 10K 2.5-inch Enterprise SATA HDD Kit	TC.32700.090
Acer 300GB 3Gb/s 10K 2.5-inch Enterprise SATA HDD Kit	TC.32700.088
Acer 500GB 3Gb/s 7.2K 2.5-inch Enterprise SATA HDD Kit	TC.32700.046
<u>Acer SATA Hot Plug SFF (2.5-inch) Enterprise SSD Drives</u>	
Acer 32GB SLC SATA 2.5-inch Enterprise SSD Kit	TC.33900.003
Acer 64GB SLC SATA 2.5-inch Enterprise SSD Kit	TC.33900.004
<u>Acer Additional Upgrades</u>	
Acer 1/10Gb L2/3 Ethernet Switch Module for Blade Enclosure	TC.35900.007
Acer 4X QDR Infiniband Switch for Blade Enclosure	TC.35900.008
Acer 4X QDR Infiniband Switch w/ miniCMM Kit for Blade Enclosure	TC.35900.009
<u>Acer Operating Systems</u>	
<u>Windows Server Enterprise 2008</u>	
Acer ROK Windows SVR 2008 R2 Enterprise (64bit,25Clt,EN)	TC.34400.035
Acer ROK MICROSOFT Win SVR 2008 64bit Ent R2 10 Clt EN W/COA W/CD/DVD ACER 1-8CPU	TC.34400.034
